

CREATE
SYNCHRONIZED
RICH MEDIA
PRESENTATIONS
FOR ONLINE
COMMUNICATIONS
& E-LEARNING

CUSTOMIZABLE PRESENTATION EXPERIENCE

- Presenter video window
- Live or on-demand training
- Presentation slides and visuals
- Downloadable documents and course materials
- DVD-like controls

MULTI-MEDIA LEARNING

MOBILE AND EASY TO USE

The Capture Cart™ contains all the hardware and software to create custom streaming and on-demand classroom recording. Simply roll in the Capture Cart and you are ready to capture your presentation for live broadcast or on-demand viewing. Just present your information normally and the Capture Cart will do the rest, including capturing audio and video content and all of the visual information shown on your PC. When you are done, the system has saved a copy of your presentation that can be edited and made searchable within the Media Management System.

ONE-CLICK LIVE BROADCASTS

The Capture Cart is designed to bring a presentation beyond the walls of a classroom or conference room with the click of a button. Simply select a customizable interface, add optional descriptive information about the presentation - such as speaker name, content description and date - and click start. It's that simple.

MEDIA MANAGEMENT SYSTEM

END-TO-END PUBLISHING AND CONTENT MANAGEMENT

- Custom branded portal to categorize and manage media
- Able to publish to a custom content portal
- Viewers can access content directly
- Leverage search technology and use search queries to locate content quickly and efficiently
- Intuitive search menu to quickly and easily locate assets

PRESENTATION EDITING

- Edit the live presentation before publishing to on-demand viewing
- Add or remove images
- Change the timing of synchronized images
- Add, remove or edit chapter timing within the presentation

USER AUTHENTICATION AND TRACKING

- Secure content from unauthorized viewers
- Monitor user and content performance
- Provide real-time information on exactly which viewers are on-line during live events and track real on-demand media consumption over time

AUDIENCE INTERACTION REPORTING

- How long viewers watched a particular segment
- If they interacted with rich media elements
- Average session length
- Peak viewer times and dates

ADDITIONAL CAPABILITIES

- Create and/or customize templates to promote unique branding and messaging
- Utilize the Capture Cart's built in A/V encoder or employ third-party remote A/V encoders
- Capable of publishing your presentation to CD or DVD
- Capable of creating audio podcasts to online portals and availability via RSS feed

OPTIONAL COMPONENTS

- Presenter Tracking Camera
- Wireless Network
- Hosted Content System
- Customized Laser Engraved Cabinet Door

CAPTURECART™ COMPONENTS

- PTZ Video Conference Camera
- Standard or Portable Cart
- Capture Station
- Keyboard & Mouse
- Flat Screen Monitor
- Speakers
- Audio Mixer
- Wireless Microphone
