

MANAGED SOLUTIONS

MANAGED BACKUP & STORAGE

Your data represent the core of your business. You have invested a lot of time, money and effort in developing your invaluable business data, which you cannot afford to lose.

Poor "unstructured" conventional backup methodologies, such as tape, CD Rom, and external hard drive are not good enough

Hosted Backup & Storage Solution offers:

- Continuous data protection (CDP)
- Support to all platforms and common databases
- Support of load-balancing and Windows Active Directory
- Backup 500GB in one night
- Backup individual mail in Microsoft Exchange Server
- Limited cost, unlimited protection
- Easy to use and manage
- Suitable for users with different needs

MANAGED SPAM & ANTI-VIRUS FILTERING

Boyer Technologies offers an affordable and powerful solution to annoying and damaging spam.

Our spam filtering architecture optimizes the processing of each email to maximize performance and process millions of messages per day. Unlike software solutions, our filtering solution reduces the load placed on the email server by off-loading both spam and virus filtering.

Also included is essential outbound filtering which includes attachment scanning, virus filtering, rate controls and encryption. This feature helps to ensure that all outgoing email is legitimate and virus-free.

Our spam & anti-virus solution is continuously updated with the latest spam and virus definitions every hour to continuously monitor and block the latest Internet threats.

MANAGED WEB-MAIL

CORE FEATURES

- Webmail v3
- IMAP, POP3 & SMTP

- API for administration

BOYER TECHNOLOGIES • YOUR ONE-STOP TECHNOLOGY PROVIDER

Information technology is a fast paced and ever-changing environment. Boyer Technologies provide customized business solutions which lower both client investment and recurring monthly costs. We are a one-stop source for all your technology needs. Our tailored services allow our clients to scale up or down as business needs change. Your business no longer needs to purchase the latest technology to manage their IT assets. Allow the technology experts at Boyer to keep your business running smoothly without data failures and excessive IT cost. Let Boyer Technologies become your one-stop technology provider.

MANAGED SOLUTIONS

MANAGED VOICE SYSTEMS

Simplify and save with a truly customized and reliable Boyer phone system solution. We can use your existing phone technology, whether analog, digital or VoIP, along with the newest voice technology to solve your toughest phone challenges.

Boyer Technology can provide one solution for local call service, long distance, Internet access, and voice and data equipment. A one-provider solution saves valuable time and financial resources. It's no longer necessary to spend time and money managing telecom vendors.

BENEFITS

- Reliable, cost effective solution that grows with your business
- Reduce costs
- Simplify telecom management
- Get the customized solution you need
- Call free between your locations, call less everywhere else

MANAGED VIDEO CONFERENCE SYSTEMS

Take communication with customers, vendors and staff to a whole new level. More and more companies and organizations are adopting video communication as a way to:

- Save the time, costs and hassles of travel
- Enable in-person collaboration, no matter where participants are located

Business is all about relationships, and next to a handshake, there's no better relationship tool than real-time video communication.

In the past, businesses only had two video conference options: Low cost, low quality or high cost, high quality. Managed Video Conference fills the gap by providing a low cost, high quality solution that can be used at both low resolution for travelers with limited bandwidth, and at high resolution for a video conference experience in a traditional conference room.

MANAGED VIDEO SURVEILLANCE SYSTEMS

Managed video surveillance is an easy to use, highly scalable and centrally administered business solution, which does not consume your IT staff or network resources. A managed system enables you to control remote video to improve performance and/or security.

FEATURES

- Digital video cameras can stream video to private site, accessible anywhere via Internet
- Video images can be searched and categorized
- Round-the-clock digital access to video content via a subscription service

BENEFITS

- **Manage remotely.** Access business footage in real time, allows you to check in and manage your facility after hours or from a remote location.
- **Analyze business.** Video can be searched by date, time, or transaction. View and analyze transactions and customer purchasing behavior.
- **Verify training.** Review employees at work to ensure safety and manufacturing procedures are followed.
- **Reduce costs.** Track raw material usage and waste.
- **Enhance security.** Recorded images assist in criminal investigations.
